

UAT Feedback & Proposed Enhancements Document

Project: Student Onboarding Platform

Date: 13 July 2026

Prepared By: Malini V

Status: Requirements Gathering / UAT Feedback

Executive Summary

During the recent User Acceptance Testing (UAT) phase, the client reviewed the Student Onboarding Platform and provided feedback for further improvements. This document outlines the 6 new feature requests identified by the client to enhance user experience, administrative control, and tracking capabilities.

Proposed Enhancements

1. General Enquiry Form (Google Form Style)

Target User: Prospective Students / Guests

Description: A public-facing enquiry form (similar to a Google Form) embedded on the website/app.

Key Features:

- Allows visitors to ask questions or request a callback before signing up.
- Captures Name, Email, Phone Number, and Enquiry Message.
- Admin dashboard gets a new "Enquiries" tab to view and respond to these leads.

2. Course Completion Certificate Download

Target User: Enrolled Students

Description: An automated certification generation system for students who successfully finish their enrolled courses.

Key Features:

- Automatically unlocks when course progress reaches 100%.
- Generates a branded PDF certificate with the student's name, course name, and completion date.
- Easily downloadable directly from the student's "My Courses" dashboard.

3. Payment Receipt Download

Target User: Enrolled Students

Description: A billing and invoicing feature that allows students to download official payment receipts after purchasing a course.

Key Features:

- Generates a downloadable PDF receipt containing transaction ID, amount paid, course details, and date.
- Available immediately after successful payment checkout and permanently accessible in the student's "Billing/Payments" history page.

4. Course Progress Tracking (e.g., 3-Month Courses)

Target User: Enrolled Students & Admins

Description: A detailed progress tracker to monitor how far a student has progressed through a long-term course (like a 3-month curriculum).

Key Features:

- Visual progress bar (0% to 100%) for students on their dashboard.
- Module-by-module tracking (e.g., Month 1, Month 2, Month 3 checkpoints).
- Admins can view individual student progress to identify who is falling behind.

5. Admin Analytics & Monthly Reports Page

Target User: Administrators

Description: An advanced analytics page added to the Admin Dashboard to track monthly platform growth and student success rates.

Key Features:

- **New Enrollments:** Graph/Count showing how many new students joined the platform this month.
- **Completions:** Data on how many students successfully completed their courses in the current month.
- Date filters to compare current month performance with previous months.

6. Admin-to-Student Push Notifications

Target User: Administrators

Description: A communication tool allowing the Admin to broadcast messages or send direct notifications to students.

Key Features:

- Admin can type a custom message and send it to all students, a specific cohort (e.g., all React students), or an individual student.
- Notifications appear in a "bell" icon dropdown inside the student's portal.
- (Optional) Can trigger parallel email alerts for urgent announcements.
