

Agile User Stories — UAT Enhancements

Project: Student Onboarding Platform

Feature 1: General Enquiry Form

*As a prospective student or guest,
I want to submit a general enquiry form on the website/app,
So that I can ask questions or request a callback before deciding to register for a course.*

Acceptance Criteria:

- **Given** I am on the public website, **When** I navigate to the "Contact Us" or "Enquiry" section, **Then** I should see a form requesting my Name, Email, Phone Number, and Message.
- **Given** I fill out the form with valid details, **When** I click submit, **Then** I should see a success confirmation message.
- **Given** I am an Admin, **When** I log into the admin dashboard, **Then** I should see a new "Enquiries" tab listing all submitted forms sorted by newest first.

Feature 2: Course Completion Certificate

*As an enrolled student,
I want to download a completion certificate once I finish a course,
So that I can showcase my achievement to employers or on my resume.*

Acceptance Criteria:

- **Given** my course progress is below 100%, **When** I view the course dashboard, **Then** the "Download Certificate" button should be disabled or hidden.

- **Given** I reach 100% completion in a course, **When** I view the course dashboard, **Then** the "Download Certificate" button should become active.
- **Given** I click the active download button, **When** the system processes the request, **Then** a branded PDF certificate containing my name, the course name, and completion date should download to my device.

Feature 3: Payment Receipt Download

*As an enrolled student,
I want to download a payment receipt for any course I have paid for,
So that I have official proof of purchase for my records or reimbursement.*

Acceptance Criteria:

- **Given** I have successfully purchased a course, **When** I navigate to my "Billing" or "Payment History" page, **Then** I should see a list of my transactions.
- **Given** I click "Download Receipt" next to a transaction, **When** the system processes it, **Then** a PDF receipt should download containing the Transaction ID, Date, Course Name, and Amount Paid.

Feature 4: Course Progress Tracking

*As an enrolled student,
I want to see a visual progress tracker for my long-term courses,
So that I know exactly how much of the course I have completed and what is left (e.g.,
Month 1, Month 2).*

Acceptance Criteria:

- **Given** I am enrolled in a course, **When** I view my dashboard, **Then** I should see a progress bar indicating my completion percentage (0% to 100%).
- **Given** I complete a specific module or month checkpoint, **When** the system updates, **Then** my progress bar should advance automatically.
- **Given** I am an Admin, **When** I view a student's profile, **Then** I should see their exact progress percentage for all their enrolled courses.

Feature 5: Admin Analytics & Monthly Reports

As an administrator,

I want to view a monthly statistics dashboard showing enrollments and course completions,

So that I can measure the platform's growth and track overall student success rates.

Acceptance Criteria:

- **Given** I am an Admin, **When** I navigate to the "Analytics" tab, **Then** I should see a chart/count of new student sign-ups for the current month.
- **Given** students have finished courses this month, **When** I view the analytics page, **Then** I should see the total count of course completions for the month.
- **Given** I want to view historical data, **When** I use the date filter dropdown, **Then** the analytics should update to reflect the selected time period.

Feature 6: Admin-to-Student Push Notifications

As an administrator,

I want to send notifications or broadcast messages to students,

So that I can keep them informed about important updates, deadlines, or new courses.

Acceptance Criteria:

- **Given** I am an Admin, **When** I go to the "Notifications" manager, **Then** I should be able to type a message and select the target audience (All Students, Specific Course Cohort, or Individual Student).
- **Given** the Admin sends a notification, **When** the target student logs in, **Then** a red badge should appear on their "bell" icon indicating a new unread message.
- **Given** the student clicks the bell icon, **When** the dropdown opens, **Then** they should be able to read the Admin's message.
